This Key Information Document has been created on 15.06.2020.

You are about to purchase a product that is not simple and may be difficult to understand

WHAT IS THIS PRODUCT?

TYPE You will enter into a unit linked life insurance contract with Allianz Global Life dac

OBJECTIVES Allianz Target 4 Life is a unit linked insurance product with an attaching death benefit providing the opportunity to invest in managed funds. You will continue to have access to your funds through surrenders and on death your dependents will receive any remaining fund value plus a death benefit. You will be invested into a range of internal funds based on your chosen risk profile, premium payment option and Lifecycle term. These may include Fixed income (medium and short term), Commodities, Emerging market bonds and equities, US and Global equities and European corporate bonds. The Lifecycle feature ensures that the customer's funds are invested into decreasingly risky assets as they move closer to the end of their Lifecycle term. These include Equities and Fixed Income assets and will be invested into Global markets including Europe, the US and Asia.

The return on your investment will depend on the performance of the internal funds, charges applied, risk profile chosen and Lifecycle term.

INTENDED RETAIL INVESTOR The product is designed for customers;

- who would like an insurance company to manage their savings as they move closer to retirement age
- wishing to provide additional protection to dependents in the event of their death
- wishing to achieve fiscal advantages from investment growth within a unit linked insurance product compared to direct investment
- who have some knowledge of how insurance based investment products work
- with a medium to long term investment horizon
- who understand that they may lose part or all of their investment

INSURANCE BENEFITS AND COSTS In the event of the policyholder's death after 6 months from contract commencement, their beneficiaries will receive their fund value plus an additional death benefit.

Up to age 66 an additional death benefit will be provided equal to 10% of premiums paid. In this calculation Premiums paid will be reduced by any money taken by you from your fund since the start of your policy. The maximum additional death benefit allowed is 50,000 euro.

The additional charge for providing the insurance guarantee is 0.25% of your fund per annum. The reduction in yield resulting from offering this insurance benefit is 0.25%. Please refer to the costs section for further information regarding the reduction in yield. The value of this benefit is reflected in the risk indicator and performance scenarios shown in the section 'what are the risks and what could I get in return'. This is based on a typical customer aged under 66.

TERM OF THE PRODUCT The product term is equal to how long you live for. It will terminate on the earliest of the following dates;

- death of the customer
- full surrender by the customer

Allianz Global Life dac cannot terminate the contract unilaterally.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The risk indicator assumes you keep the product for 10 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

PERFORMANCE SCENARIOS

INVESTMENT 1,000 EUR PER YEAR		1 YEAR	5 YEARS	10 YEARS (RECOMMENDED HOLDING PERIOD)
Survival Scenarios				
Stress scenario	What you might get back after costs	597 EUR	3,818 EUR	6,980 EUR
	Average return each year	-40.32 %	-8.86 %	-6.66 %
Unfavourable scenario	What you might get back after costs	906 EUR	4,224 EUR	7,923 EUR
	Average return each year	-9.38 %	-5.57 %	-4.28 %
Moderate scenario	What you might get back after costs	986 EUR	4,789 EUR	9,322 EUR
	Average return each year	-1.39 %	-1.43 %	-1.28 %
Favourable scenario	What you might get back after costs	1,075 EUR	5,453 EUR	11,047 EUR
	Average return each year	7.48 %	2.90 %	1.80 %
Death Scenario				
Insured event	What your beneficiaries might get back after costs	1,036 EUR	5,039 EUR	9,822 EUR

This table shows the money you could get back over the next 10 years, under different scenarios, assuming that you invest 1,000 EUR per year. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period/maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF ALLIANZ GLOBAL LIFE DAC IS UNABLE TO PAY OUT?

In the unlikely event of a default by Allianz Global Life dac, the investor may incur a financial loss. There is no compensation system or guarantee fund.

WHAT ARE THE COSTS?

COSTS OVER TIME The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 1,000 EUR each year. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

INVESTMENT 1,000 EUR PER YEAR SCENARIOS	IF YOU CASH IN AFTER 1 YEAR	IF YOU CASH IN AFTER 5 YEARS	IF YOU CASH IN AFTER 10 YEARS
Total costs	30 EUR	472 EUR	1,730 EUR
Impact on return (RIY) per year	2.96 %	3.14 %	3.09 %

COMPOSITION OF COSTS

The table below shows:

— the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;

— the meaning of the different cost categories.

THIS TABLE SHOWS THE IMPACT ON RETURN PER YEAR			
One-off costs	Entry costs	0.16 %	The impact of the costs you pay when entering your investment. This is the most you will pay and you could pay less. This includes the costs of distribution of your product.
	Exit costs	0.00 %	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.00 %	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	2.93 %	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	0.00 %	not applicable
	Carried Interests	0.00 %	not applicable

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

RECOMMENDED HOLDING PERIOD: 10 YEARS

This product is designed for medium to long term investments therefore you should be prepared to hold the insurance for 10 years. This is due to the nature of underlying investment assets and your chosen LifeCycle term. The appropriate holding period for individual investments will depend on a number of factors including the customer's overall diversification needs and individual circumstances.

During the first 30 days of the contract you may choose to obtain a refund of your fund value plus all charges taken during that period. Any levies and taxes paid by you will also be refunded. After 3 months you may choose to obtain a full surrender without incurring any surrender penalty, or a partial surrender at a cost of EUR 50.

HOW CAN I COMPLAIN?

For any complaints relating to the product or product manufacturer you can contact us by letter addressed to Allianz Global Life dac, Allianz Global Life dac, Maple House, Temple Road, Blackrock, Dublin, Ireland. You can also send an e-mail to iceland_agl@darta.ie or call + 353 1 242 2300.

For Complaints relating to the Intermediaries listed in Section B or D of the Intermediary Register (Banks or Brokers) and their employees and associates involved in the business cycle of the Company, you may contact the Intermediary directly. If you do not feel satisfied with the outcome of the complaint or if there is no response within the maximum deadline set by the Regulator, you may submit an request to the Financial Supervisory Authority (FME), Katrínartún 2, 105 Reykjavík, Iceland.
